

BLAZER BAY

675 Ultimate Bay

INFORMATION

The 675 Ultimate Bay is the tournament anglers dream... At 22 feet, the 675 offers an incredible amount of space, including: the unobstructed front casting deck, huge storage compartments and walk-a-round gunnels. The 675 also offers something not commonly found in a 22 foot bay boat, PERFORMANCE! It is common to achieve speeds of 70 MPH or more when powered by a 250 HP outboard. The 675 provides a dry, stable ride that matches its sporty good looks.

We named this boat the Ultimate Bay for a reason... Its combination of performance, space, ride and comfort are unmatched in the Bay Boat market.

Contact your local dealer today and take a ride in the 675 Ultimate Bay.
